WEB DEVELOPMENT PROJECTS

Code Club — *Full-Stack Developer*

February 2021 - March 2021

- Architected an event meet-up PWA built with React; used Google Calendar API and Amazon AWS Lambda serverless platform to fetch events.
- Developed with TDD techniques, FP & OOP paradigms, and data visualization.

myFlix DB — *Full-Stack Developer*

December 2020 - January 2021

- Designed REST API with MongoDB Atlas, for a future online movie database application. Constructed endpoints in server-side code for all CRUD requests.
- Established security processes including password hashing encryption, JWT authentication and CORS.

EDUCATION

Udemy, Remote —*Becoming a WordPress Developer Certificate*

March 2021 - Present

- Using WordPress as a true Content Management System; creating custom post types, fields and crafting relationships between various content types, writing PHP to manipulate the data of a WP site.

CareerFoundry, Remote — *Full-Stack Web Development Certificate*

November 2020 - April 2021 (Expected)

- Created various projects as a full-stack developer; handled all stages from planning to final deployment, and through this developed capability in HTML, CSS, JavaScript, jQuery, React and React Native.

SheCodes, Remote — *Introduction to Coding Certificate*

September 2020 - October 2020

- Created functional app mockups through studying the fundamentals of web development.
